 Hieu Vu Tong Minh |  vtmhieu |  hieuvtm.site |  vtmhieu111@gmail.com |  WhatsApp |  Stockholm

SUMMARY

Platform Engineer with expertise in Kubernetes and cloud infrastructure, delivering managed services to 100+ enterprise customers. Skilled in automation with Operators/CRDs and building reliable, scalable distributed systems. Available for full-time roles from June 2026.

EDUCATION

- 2025 – Present** **MSc Software Engineering of Distributed Systems**, KTH Royal Institute of Technology
Stockholm
Advanced Distributed System (A), Data Mining, HPC, Network Systems for ML
- 2019 – 2023** **BSc Electronics and Telecommunications**, Hanoi University of Science and Technology
Hanoi
GPA: 3.58/4.0
Ranked **1st in the graduation thesis defense (9.5/10)**

WORK EXPERIENCE

Cloud Platform Founding Engineer - FPT Smart Cloud (Team size: 6) *August 2023 - August 2025*

Founding engineer at a public cloud provider, building the Managed FPT Kubernetes Engine (M-FKE). Engineered the underlying control-plane infrastructure to provide Kubernetes as a managed service (similar to AWS EKS) to 100+ enterprise customers, powering 500+ customer clusters across Vietnam and Japan.

- Owned and engineered a Kubebuilder-based Kubernetes Operator from the ground up to automate persistent volume (PVC) backups and cluster-state recovery. Architected custom CRDs and complex reconciliation loops to orchestrate cron-scheduled snapshots, enforce retention policies, and manage on-demand restoration across OpenStack shoot clusters, directly unlocking contracts with compliance-heavy clients (Go, Kubebuilder, Cinder CSI, etcd).
- Engineered cluster hibernation workflows within the M-FKE control plane, automating node scaling to zero and reducing compute overhead costs by 30% for cost-conscious enterprise clients. (Go, Kubernetes, OpenStack)
- Orchestrated the refactoring of Gardener-based MCM/CCM with Terraform, automating hybrid-cloud lifecycle management across OpenStack and VMware vSphere while reducing VM cluster join times by 20%. (Go, Terraform, Gardener)
- Integrated Cilium (eBPF-based networking) and implemented Layer 4/Layer 7 load balancing to meet strict enterprise security requirements, providing customers with multi-zone high availability and advanced network policies (Cilium, eBPF, Proxy Protocol).
- Orchestrated zero-downtime quarterly Kubernetes upgrades (up to v1.32) across multi-site environments, maintaining continuous platform stability for our client base (Kubernetes, GitOps, CRDs).
- Partnered with enterprise customers to migrate their staging and production environments from AWS to the Managed FPT Kubernetes Engine, ensuring minimal downtime and seamless architectural transitions (AWS, Kubernetes, Helm, Terraform).

Backend Developer Intern - Viettel Cyber Security

June 2022 - November 2022

Selected for the competitive VCS Talent Program.

- Created and launched a backend application to manage internal company servers, providing a centralized system for tracking and managing infrastructure resources (Go, PostgreSQL, Docker).
- Implemented role-based access control (RBAC) and secure RESTful APIs to manage user permissions, and containerized the application services to ensure consistent deployment (Docker, REST APIs).

TECHNICAL SKILLS

Languages	Go, Python, Rust, Bash, Erlang/OTP
Cloud & Infrastructure	Kubernetes (Operators/CRDs), OpenStack, VMware vSphere, Terraform, Docker, Linux
Tools & Databases	Prometheus, Grafana, Loki, PostgreSQL, MySQL, MongoDB, Redis, etcd, Git, CI/CD
Core Competencies	Distributed Systems Design, Cloud-Native Architecture, Networking (eBPF, Cilium), Backend Engineering

CERTIFICATIONS

March - 2026 **AWS Certified Solutions Architect – Associate (SAA-C03)**

LANGUAGES

English Professional Working Proficiency (IELTS: 7.0)
Vietnamese Native
